REPLACEABLE DRAWBAR

" The replaceable drawbar and shock housing eye are valuable features."

- Ron Zoglmann, USF Dugan

Ron has mentioned a feature that is unique to the Silver Eagle VA Dolly – a replaceable drawbar. This is the result of a carefully engineered huck-bolted design. Our patented change in design (US Patent No. 6,056,309) and use of stronger steel has more than doubled the strength of our drawbar.

Regardless of strength, accidents do happen. When they do, either side of the drawbar can be replaced by removing the old and bolting on the new. No welds to cut. No welding to install. Convenient replacement with grade 8 bolts. **Lower maintenance cost.**

Simply put, the replaceable drawbar is a valuable feature. Just like Ron said.

The next time you are in the market for new dollies, invest in the Silver Eagle VA – the dolly with features that pay for themselves time and again.
