

easiest to maintain

"I've worked on a lot of dollies. The Eagle VA is the easiest dolly to maintain."

*- Mike Bullara
Sysco Food Services - Alabama*

"The replaceable drawbar and shock housing eye are valuable features."

*- Ron Zoglmann
USF Dugan*

Drawbar replacement can be accomplished with no welding. One side of the drawbar can be replaced instead of having to replace the entire drawbar assembly. Our patented change in design and use of stronger steel has more than doubled the strength of the drawbar.

No spring hangers or radius rods to maintain.

5th Wheel mechanisms easy to get at.

E-Coated metal parts provide superior corrosion resistance.

Requires no welding to replace the eye.

Rubber shock-mounted eye and shank absorbs shock in starting and stopping, transferring less shock to equipment and cargo.
