

Fighting Corrosion

Lasting longer, looking better

*E-Coating (Electro-deposition coating)

Superior to electro-static processes, our e-coat system applies an electrical charge to the metal part immersed in a bath of oppositely charged paint particles. The paint particles form an even, continuous film over every surface, in every crevice and corner.

Meets demanding US military spec #P-53084 (ME)

- Finish lasts 400% longer
- Stops rust migration
- Better fleet appearance
- Superior corrosion resistance
- Reduces re-painting cost
- A Silver Eagle exclusive

*Galvanizing

- Self healing
- Cost-effective
- No painting
