

Tire Life

longer tire life

"We have seen improvement in tire wear with the Silver Eagle dolly versus conventional dollies."

*- Larry Schultz
Motor Cargo, Inc.*

"We selected the Silver Eagle VA dolly because of features that pay for themselves in the long run."

*- Dan Umphress
American Freightways*

lower tire cost

- ❑ 20% longer life on the roadside tires
- ❑ 16% more remaining tread depth
- ❑ More uniform wear patterns

Independent tire research conducted over four years proved that the Silver Eagle dolly provides significantly longer tire life than conventional dollies made by other manufacturers. The Eagle VA design provides better balanced wear curbside to roadside.

The principle cause of side to side tire wear is the "directional torque" of the vehicle, which is constantly pulling toward the crown on sloped pavements. This action provides less weight on roadside tires and greater weight on the curbside with conventional longitudinal spring suspensions. Silver Eagle's transverse spring design balances the load left and right resulting in more uniform wear patterns. Just one of the reasons for longer tire life.
